Web Developer, UI/UX Designer - Jericho Advertising

October 2021— October 2023

Jericho is advertising agency and I was hired as a UI/UX designer but my role evolved to be the web developer when a positioned opened up at the company .

Key Responsibilities:

I served as a Developer and .UI/UX Designer, contributing to high-impact campaigns for major clients, including and Pick n Pay.

My responsibilities included:

- Developing user-digital experiences.
- Designing visually engaging interfaces, and
- Ensuring seamless functionality across platforms.

This role allowed me to merge technical development skills with creative design, delivering digital solutions that met both aesthetic and business objectives for top brands.

Developer Intern - Econet Wireless

April 2019 — Nov 2020

As a Junior Developer at Econet Wireless, I contributed to the customization of the Sasai app, tailoring it to meet the unique needs of various African regions. My role involved adapting user interfaces, localizing content, and implementing region-specific features to enhance user engagement across diverse markets. This experience honed my skills in cross-cultural user experience design and helped me understand the technical challenges involved in delivering digital solutions across multiple countries.
